

# The EweGrow <sup>tm</sup> Enterprise Constellation Plan

1. The EweGrow Constellation's Priorities
2. Symbols and Sounds
3. EweGrow Constellation Components
4. The Legal Approach and Elements
5. Funding Strategies; MoE's, ECoVs, and FUNS
6. Financials, Investment and Returns
7. Employee Ownership
8. Governance
9. Justice and Conflict Resolution
10. Marketing
11. Ongoing Strategies, Growth and International inclusion
12. Initial Steps
13. Projected 1,3,5 and 10 year outcomes

**Commented [ep1]:** Points of Guidance from Olu:  
) Seeds sourcing and distribution. Any plan for collaboration and or affiliation?

2) At what point do you begin to issue ECoV? How do you plan to achieve this?

3) Fundraising? Maybe you can make it more elaborate. Target participants and motivation for doing so.

4) Any plan for food storage? Who stores the products? Who is responsible for perishable and unsold goods?

These are the things that I feel we should be clear about at the moment.

**Commented [ep2]:** The answer to this question: -  
*Fundraising? Maybe you can make it more elaborate. Target participants and motivation for doing so.*-will be here, in a chapter of its own:

**Commented [ep3]:**

## The EweGrow Constellation's Priority

The EweGrow Enterprise Constellation's sole priority is to reintroduce the American people to their own power to improve their economy, health and lives. We focus on the food supply to start, and all things expand from there. Increasing the Organic food supply, increasing knowledge of Nature's generosity, healing, and increasing financial empowerment. Reuniting Americans under common desires for mutually beneficial goals. Introducing Americans to a formula of self-governance, self-finance, self-repair of society, environment and health.

Our food supply nationally degrades health, not only of the people, but also the planet and its other residents, like bees, and birds. It is controlled by too few, and managed so poorly. EweGrow in its constellation of organizations leads Americans to a new true organic food supply network.

EweGrow builds our national organic food suppliers and recipients in a multiple method manner. Simultaneously, we approach this effort from a few vantage points.

1. EweGrow extends into social media through selected influencers to make growing fun, to initiate a trend, to sustain the social aspects of growing some portion of one's own food.

1.1. This is an important effort because currently the majority are so disconnected from their own ability to provide a portion of their own food, this disconnection reflects in a deep experience of powerlessness. This powerless experience is generated by the lack

of so many self-help and DIY basic skills, EweGrow will expand itself to empower many more skill sets. For maximum initial benefit, EweGrow will promote a national organic food supply as built by the people of the nation.

- 1.2. The effort of motivating people to grow on their decks, their tabletops, their sunny interior walls foods such as herbs, tomatoes, sprouts and microgreens begins to introduce Americans to the reality of generosity of Nature through her seed.
- 1.3. The national seed supply has been severely impacted by Monsanto and GMO's, EweGrow will provide Americans a mission to restock our national seed supply with heirloom organic seed that is not sterile, that replicates in abundant generosity.
- 1.4. The EweGrow Website, a national networking, learning and sales platform delivers the impressions of Nature's generosity regularly, and so begins to end the national scarcity mindset created and needed by those who have been extracting wealth and wellbeing from the American people.
- 1.5. EweGrow sets a standard bar of true organic, humane and integrated permaculture biodiverse growing and farming practices with that standard understood and upheld proudly by the Americans that participate.
- 1.6. The massive educative for Americans disassociated from the food production supply effort is integrated with sales marketing, teachings and social media posts and testimonials. It will be seamlessly offered as mutual support, educative material and classes which themselves may be part of a purchase of home growing materials and promotion of outcomes worthy of pride. In this manner Americans of EweGrow will be introduced to the health and healing of proper true organic food supply, and the

variations of diet that provide healing outcomes. They will become knowledgeable regarding the poor health outcomes of existing national food stuffs, and additionally be introduced to the massive healing power Nature provides, and methods of using or accessing healing extracts, combinations, and the like.

1.7. They will learn how the businessmen of medicine have ignored and driven out and aside the curative power provided by Nature, how the business of medicine has profited by sickness and promoted it. Americans can clearly see the decline of good health, EweGrow will provide them with context, answers and connections.

**2. EweGrow approaches the expansion of the organic food supply by raising money that is directed to pay existing farmers to plant crops and to allow them to repay a no interest loan in EweGrow certificates of value (ECoV).**

2.1. These certificates are conveyed to investing Americans, and used for local purchases of raw fresh organic food, or purchases of foods that are prepared for storage, available for shipping through the website.

2.2. Men and Women investing in this manner who purchase organic products online will be paying the shipping fees with USD for the time being.

2.3. The ECoV will be a manner of asset backed storage of wealth.

**3. The EweGrow website is for national use, and it will have the capacity to serve local regional needs with a click. Therein it will offer a networking service that will connect local green thumbs to new gardeners.**

- 3.1. People with lawns, and with decks, balconies, interior sunny windows, walls, shelf space or counterspace, in dedicated grow rooms, using towers, flats, pots, raised beds or pockets, or even repurposed DIY container systems, are invited to hire local help.
- 3.2. This local help provide the expertise to grow, it can be offered as direct implantation and care of gardens or exterior plants in service packages, or it can be offered as a purchase of a pot, seed or seedling, a flat or sprout system delivered to the home and then access to a local green thumb via a zoom group or meet up group that is localized to promote connection.
- 3.3. Thus, along the agency model, EweGrow will provide spot employment for local green thumbs and increase local efforts of expanding the true organic food supply.
- 3.4. EweGrow partners with existing local businesses, farms and garden centers, and suppliers on a reasonable and modest commission basis to uphold the small businesses already providing organic growing products.
- 3.5. Where more business is needed locally, EweGrow provides investment, education and support through its nonprofit, and by way of its ECoV.

**4. A basic priority of EweGrow is to rebuild community through the rebuilding of our food supply in a true organic manner.**

- 4.1.1. So the outcomes, the improvements in health and in particular children's health who are now so negatively impacted by additives like aspartame, chemicals and GMO effects of processed foods, red dye, gluten, sugars, etc, will improve, and these evidences of improved health and attitude will surge greater interest in EweGrow.

4.1.2. The localized networking will bring new growers together at events, solstices for example, with mini vending fairs with picnics, speakers inviting local persons to share their examples of success. EweGrow will bring unification of Americans by not ever needing to associate our work with any party or political ideology. It will be understood that everyone benefits from true organic food, bar none. This will begin the profound healing needed in America.

5. **All of EweGrow's subsequent efforts to rebuilding America stays within the needs of Americans that cannot be separated by divisive political ideology.**

5.1. EweGrow considers Americans as members of the American family of humanity.

Everyone, each man, woman and child is of humanity, the key is to create circumstances where we all may behave with honor. Staying the course of this perspective, EweGrow steers clear of differentiations as described by polarized movements. It will eschew products, abstaining from services that promote polarized ideologies.

5.2. The singular approach or ideology that EweGrow Will promote is the Service of Nature for the good of all humanity and earth, and the existence of a Source Intelligence greater than each one of us to which we each have continual access and empowerment to express.

5.3. In other words, EweGrow only focuses on that which everyone needs, not the needs of a particular section of society. EweGrow Social leaders (a better name than influencers) are of all types of American cultures, and provide their leadership in native

tongues. EweGrow Gatherings of Cultures will be planned to share foods, results and wisdom.

5.3.1. EweGrow will not celebrate or promote national holidays, for a number of good reasons, their divisive capacity and the abuse of these holidays for mercenary reasons. It will, however, begin traditions that bring community together.

5.3.2. EweGrow has the opportunity to profoundly restore an experience of natural time by utilizing the 13 Moon calendar system for its dating methodology. The 13 Moon calendar system inspires a holistic beneficial change, since the Gregorian calendar artificially apportioned the calendar into 12 months, not 13 in accordance to the moon cycles.

**6. The EweGrow website has the integrated element of inviting and allowing participation in the site as a member of a private club. This club will be named the Shepherds of Freedom Club. Likely it will be shortened to the Shepherds Club.**

6.1. This club is integral to our capacity to rebuild America in the current Corporate environment of political/corporate malfeasance and collusion. We host a cadre of professional lawyers and attorneys who will provide the legal shield for our right to rebuild America according to deeply set constitutional rights.

6.2. Private membership clubs or private trade groups are legal arenas beyond the reach of bureaucratic hindrance. However, the egregious behavior of current elements of government/corporate partnerships will try to divide the participants of private

membership groups by targeting the producer as evidenced by the recent attack on an Amish farmer for providing humanely raised and slaughtered meat to his membership group. The EweGrow Foundations legal team will protect the Clubs members from both sides, producer and purchaser, as a single unified party.

6.3. While the egregious behavior of current elements of government/corporate partnerships continues, this EweGrow Foundation legal task force will announce legal methods to have these entities stand down wherever they hinder EweGrow's work for the good of all, or our work to rebuild America and our right to do so, as the source of power from which all governmental entities derive their existence.

## Symbols, Sounds and Terms

### 1. **EweGrow intentionally invokes, each time it is spoken, an idea of reflection on God**

**Source Awareness growing, based on biblical symbology of the lamb of God.** Lambs are universally considered benign and free animals. They are never kept inside, cornered in their own muck, their kids are not separated from the mothers forlornly. As a symbol for our work, they provide all the ideas of peace, green pasture, warmth, motherhood and fellowship.

1.1. The actual phonetics of EweGrow also work for us. The long /oo/ sound brings the speaker intrinsically back to the roots of personal experience, this being one of the very

first sounds infants will utter. Recognize the popularity of this phoneme in companies like Google, and Uber and Youtube.

2. Our use of the word Enterprise in conjunction with the term Constellation naturally evokes the excitement of a science fiction classic, Star Trek. When spoken, or observed, these terms bring the user to an immediate sense of exploration and wonder, expansion and journey.
3. Shepherds of Freedom resonates with the home name of the constellation of enterprises. It will immediately be shortened in use to Shepherds, yet the full name is important to give the backbone of the club's purpose.
  - 3.1. A Shepherd is a distinctly different sort of symbol, perfect to evoke the idea of protective stewardship, and the resourcefulness of the shepherd's crook, its use as a staff, as a rescue tool and as a weapon. The Shepherd symbol allows for a protective strength, rather than a dominant aggressive ideation (Freedom fighter, Food warrior etc.) as fills America today.
4. The word Foundation is chosen, to evoke the image of connected to the earth, and a strong footing. It's a word in ample use, so it will be readily accepted.
5. The terms Man, Woman and Child will be deliberately favored over other common terms, such as citizen, person, voter. In fact, words like consumer and taxpayer will be specifically left out of EweGrow vocabulary. The use of Men Women and Children, singularly or collectively allows for and invites the true sovereignty of our unique power of authority to be spoken.

6. While the term Avatar is not yet integrated in the planning of the company, it is expected to be.
7. EweGrow will differentiate between profiteering and prosperity. Thus, it is a Prosperity constellation.
8. The EweGrow Constellation will intentionally avoid common terms now in use. EweGrow will simply refer to people as People, Individuals, Men, Man, Women, Woman, Youth, Child, Adult, Young Adult, Adolescent, Toddler, Infant, Elder.
  - 8.1. EweGrow is a space where people's bedroom decisions are none of our business and none of our talk. EweGrow does not weigh in on decisions that belong between the individual and God. Nor shall EweGrow cater to the myriad of expectations to participate in those private decisions by publicly participating in any lexicon or verbiage that publicly services private decisions between an individual and Source.
  - 8.2. EweGrow is for freedom of all kinds, wherever the unique path leads the individual. EweGrow simply states as Americans, whatever a Man or Woman wants to do, they have complete freedom to do so, given they are peaceful in their practice, purpose and outcomes. However, freedom to behave in a peaceful manner however creatively one wishes to does not include forcing or coercing, pressuring or guiltling others to comply. Please see the Chapter entitled: Justice and Conflict Resolution for EweGrow
  - 8.3. Thus, the participants of EweGrow may present themselves as they see themselves, as a Man or a Woman, he or she. Other terms that reflect on behavior or choices made with God for private experiences are left outside of the space of EweGrow.

- 8.4. This decision is to reign in the chaos of confusion, to create boundaries that return what is private and mysterious to the space where it belongs. America suffers from confusion and chaos, intentionally created by the very same entities that give rise to our motivation.
- 8.5. By restoring these basic boundaries, delineating what is to be private and what is to be public, the people of EweGrow will be able to focus on what truly matters, advancement of nonpolluting energy technology, organic food, natural health, prosperity, and freedom.
- 8.6. EweGrow will allow information to stand on its own merits, the ideas and terms; misinformation, disinformation and conspiracy theorist are invalid. Our freedom to speak and discuss anything is essential to our Sovereignty. Should speech use within EweGrow rise to the level of high concern, it may be the object of an accusation brought into the Determining Circles. Specifically, ad hominem and personal insults are considered immature and disgraceful, anyone using them shall be so informed and if needed brought to a determining circle. Civility is essential to our rebuilding of America. Please see the Chapter entitled: Justice and Conflict Resolution for EweGrow

## The EweGrow Enterprise Constellation Components

### **EweGrow**

### **The EweGrow Foundation**

### **The Shepherds of Freedom**

### **The Federation of Regional EweGrow Employee-Owned Trust Companies.**

### **In Safe Harbor**

- 1) **EweGrow is the seed parent organization.** It hosts the trademarks, logos, patents, copywrites and manages the national website as an agency of networking. It will be in receipt of royalties and commissions for its earnings.
  - a) **It is to be initially formed as an LLC, with most of its needs fulfilled by independent contractors.** It will partner with local existing businesses with commission plans.
- 2) **The EweGrow Foundation is the Non-Profit, and it will be designed to host the legal work, educative services, land acquisition for organic farming, and aid to upgrade life where need exists.**
  - a) **It will be in charge of expanding the use of heirloom seed, of distributing and educating about DIY systems of true organic gardening and farming, expanding the use of compost (Both vegetative and human) for heat and water health.**

- b) **It will invest in methods to open source promote non captured energy sources. In otherwords to effect speedy rapid transition from energy profiteering to nonprofit open- sourced energy solution.**
- c) **These solutions are currently suppressed, buried and the inventors harmed or killed. The EweGrow Foundation will use its legal team to fight for American’s right to suppressed technology, and for our right to the freedom from pollution and from tethers to corporate energy profiteering at the expense of life on the planet.**
- d) **To this end the EweGrow foundation may create documents declaring our right, and our remedy. It may create any numbers of movements and actions devoted to the right to Life on this planet.**
- e) **EweGrow is acutely aware of demand to halt all types of practices that insult nature and currently send our entire planet towards suicide.** The Foundation will partner with all organizations that are aligned.
- f) EweGrow Foundation, and indeed the entire EweGrow Enterprise Constellation recognizes the rapid transition to our decentralized true organic food supply is the singular best method of also taking care of the environment and health of Americans.
- g) The Foundation will invest in local trucks and equipment to aid the processing of produce grown and to distribute the excess to areas of need.
- i) It shall invest in mobile industrial kitchens that can arrive at a central location for the local gardeners and farmers to process their produce, and learn how to prepare and store food.

- ii) It shall invest in delivery trucks, along the line of ice cream trucks of old, and distribute produce. The practice of setting up and offering samples of foods prepared from fresh produce, as well as the recipes and videos and demonstration to enable Americans in that way shall be undertaken by the EweGrow Foundation.
- iii) All income from the sales of these excess products shall be used to expand the true organic and decentralized food infrastructure and all that this entails, inclusive of repairing the soils with earthworm composting, composting, biodynamics and perma-cultural practices.
- iv) The excess products are gifted to individuals, institutions, schools and agencies that use them. Produce that has been processed during education for the processing is a good source for donations.
- v) The EweGrow Foundation will seek out local farmers willing to offer the gleanings of their crops, and connect persons, providing transportation and related needed equipment (baskets, claws etc) to collect the gleanings.
- vi) The Foundation will establish a schooling body of guides and students who will learn by doing and offer farms help where needed. The

students may travel throughout the American realm to offer assistance and learn proper practices.

- vii) Once students are proficient and capable, they will be empowered to get on the land under their own stewardship, and will be served by EweGrow, The EweGrow Foundation, and The Shepherds of Freedom to stabilize their prosperity and products.
- viii) The EweGrow Foundation, once the food infrastructure is laid and growing shall turn to the housing infrastructure (and in some cases alongside), and educate a host of tradesperson in methods of natural building, creating products for natural building, and implementing means of pollution-adverse energy.
- ix) Existing systems and products such as [Greenhouses in the Snow](#), [The Green Dragon](#), Geothermal heating, small hydropower and [EzGrowGardens](#), [Hempstone](#) and hempcrete building, [Earthships](#) and [here](#), and [here](#), Earth bag and adobe building, Stone buildings, Construction Kit and mason wood, or Russian fireplaces will be the target of skill enhancements for builder and designer students.
- x) The EweGrow Foundation will host the majority of the expansion work, and invite tax free donations. It too can use a funding mechanism akin

to the CSA. Money is put up for produce not yet grown to enable the farmers to grow, and then the investors receive their products. With our networking capacity we will be able to pool the investments and make a parity certificate where the farmers and growers may pay back in product rather than dollars, and the investors may choose from more than one CSA.

xi) EweGrow will invest additionally in humane practices for animal husbandry and couple with the Shepherds of Freedom lawyers to protect the practice of humane on farm slaughter as a matter of the right to privately contract.

xii) The Foundation will fund educative explorations within aligned existing organizations, and reach out to experts such as the Amish for their willingness to share wisdom.

3) **The Shepherds of Freedom** is a private membership club. It is private but not secret, private in the sense that Americans can conduct their affairs as they wish within the club it is unaffected by the regulations or rules of the government or bureaucracy. Our need to repair the damage done to America by the corporate government, its partnerships with elite corporations and

private banking and the press is best started in the legal form of a private membership club.

- a) The general concern by the old status quo is to keep these clubs small, only the Shepherds of Freedom intends to grow large.
- b) The courts will know it is a private membership by the degree to which the members control and run it, in this regard the Shepherds will pass that bar. Please see self-governance chapter.
- c) Our freedom of association is expressed in EweGrow and focused in its Shepherds of Freedom, providing prevention of further harm to our society and ending our progressing towards planetary suicide. EweGrow brings together the methods and the synthesis of effort by the people to do so within its Shepherds of Freedom club.
- d) The hinderers to peace and prosperity, clean environment and indeed, technology that provides freedom from utility bills and pollution, will undoubtedly at some point want to shut EweGrow out of its potential.
- e) They may take EweGrow to court for presenting a Club with too many members, making it instead a public accommodation.
- f) One of the standards of a private membership club, which originally was used to serve the desires of white male wealth, seeking to be exclusive, is

its selection of members. This must happen in a specific way that shows the club is not open to anyone. The Shepherds Of Freedom club therefore, is limited to Americans who are disgusted, outraged and done with supporting a political/corporate conspiracy to prevent peace, health, prosperity and planetary harmony.

- g) There will be an agreement for the Shepherds to sign, accepting that the Shepherds will be using a method of self-governance that proves the method that one day replaces the current 2 party method of 'a democratic republic'.
- h) The Agreement will name our intention, our power as the Avatar people to invent our means of self-organization, our means of economic exchange, our means of law and order, protecting our future and our lives from the continued extinction path.
- i) Those who do belong to the Shepherds of Freedom club are banding together without concern for party ideology, or for any divisive issue coughed up by the cabal. For example, the Shepherds will neither condone nor oppose, nor even weigh in on 'right to abortion', recognizing the work we do is to alter the conditions that lead to the idea that pregnancy is undesirable. EweGrow leaves this problem to the private space of the

woman's relationship to God and her doctor. What the Shepherds work is, is to move forward to an economic reality where children are desired and welcome, and mothers and fathers supported and excited to have them.

- j) What the Shepherds of Freedom club is doing within the EweGrow Constellation is allowing the societal evolution to take place, as it rapidly must, to spare our planetary extinction, in a thoroughly peaceful and nonviolent way.
- k) The Shepherds, once membership numbers reach 10k and more will be large enough to decide to issue FUNs. These are our symbols of exchange, our Means of Exchange ( MoE), brought into direct circulation by common decree and utilized without the burden of debt/credit devices, or taxation.
- l) Should a legal challenge seek to dismantle our club for its size, we will continue anyway, since it is online, and we can subdivide the club to regional smaller units and still work as a whole.
- m) The club will not own property, all property will be held in either the EweGrow nonprofit Foundation or in regional Employee-Owned Trusts. Its purpose is to govern the EweGrow Enterprise Constellation, and to grow our methods of economic growth.

- n) Most clubs are delineated for the Courts recognition by the membership fees, historically, as this form was established by white male wealth, fees are set quite high. The Fees to be a member of the Shepherds of Freedom club can be made reasonable and very low. There can be tiers of membership.
- o) Investors in the EweGrow Enterprise, should be in alignment with the work of the Shepherds club. Members of the club have priority trading rights and agreements.
- p) To become a member one must have a referral, and a responsible party, who will stake their privileges upon the successful inclusion of the new member.
- q) The Shepherds of Freedom club is the private contracting space where both parties to a transaction stand up for one another's right to transact according to the terms agreed upon. When this freedom of commerce and association is challenged by the destroying entities, the Lawyers retained by the EweGrow Foundation will represent their right and fight for them.
- r) This is how we begin to alter our food system for humane methods, and for true organic methods. The Lawyers will protect our right to nourishing

food, our right of conscience to prevent animal suffering. Our right to privately agree to trade in accordance to our principles.

- s) When we band together as the Shepherds of Freedom, we are preventing the usual attack on our private right to conduct trade, which usually comes by directing “illegal” legal action at the producing party, who then does not want to “throw their customers under the bus” so to speak, and by divide and conquer the minor application of private trade clubs is extinguished. Ours, because it exists within a constellation, shall grow stronger.
- t) Our Shepherds of Freedom will create the protection needed from within its ranks, security for the peace of our process. Please refer to the section on FUNs and ECoV’s for our financial means.
- u) Our EweGrow Foundation will host and educate the lawful minded to take on the hellish practices of war, poison, and extraction within the corrupt methods of justice that exist. It will challenge the forces that destroy our future, and stand up for our right to take a different way, as described in the Shepherds of Freedom.
- v) As described by Dr Stephen Greer, secret and wealthy entities on the planet have been aware of energy technology that would free the world of pollution entirely. Time and time again the inventors of numbers of

systems are assassinated, killed, their systems buried with them. Time and time again the inventor acts in the selfish manner of insisting on personal enrichment, thereby falling into the hands of great money, who then render the invention mute. The inventors use secret twists to the actual invention on any patent, and have, to a man, been taken out and their technology that could have spared the Earth's demise taken out.

- w) The Shepherds, EweGrow, The Foundation and the Regional EOT's will not speculate any further why these suicidally greedy power mongers act this way, rather we will act in unison to protect our future planet.
- x) There exists today the capacity for everyone to have abundant and free energy, furthermore, this capacity must be employed to spare our planet from suicide. The Shepherds of Freedom and the EweGrow Foundation, and indeed the entire EweGrow Enterprise Constellation will be united in a mission to open-source technology for Earth's redemption.
- y) As per the leadership of Dr Stephen Greer, EweGrow in all its organizational components will reach out to new inventors, and prioritize the building of a lab(s) with protection, where the entire building phase of inventions are live streamed and open sourced. The Shepherds will recognize the

inventors as Living Treasures, worthy of FUNs, and the inventions as Worthy Treasures, to be named in honor of the inventor.

- z) The Shepherds of Freedom will actively invite the participation of leading workers in the space of freedom and planetary redemption and peace, and seek to conjoin participation towards our mutual intention of planetary harmonic health.
  - i) The Shepherds of Freedom align with numbers of currently growing private clubs offering medical choice, and expertise outside of the entities, both governmental, corporate, and media that promote the medical business of instigating sickness for profit.
  - ii) The Shepherds of Freedom can accomplish wondrous outcomes with the FUNs they can issue once their numbers grow to the right size. The Shepherds must have enough numbers to allow for wide array of products and services, for the issuance of FUNs to be useful. The issuance could begin with smaller numbers, however the learning/application curve to implement them must be worth the effort.
  - iii) The lawyers of EweGrow Foundation will be encouraged to align with and partner with lawyers and attorneys everywhere who are standing up for good, such as the lawyers of ICAN, or The Children's Health

Defense. These entities will be accepted within the Shepherds of Freedom Club and the EweGrow Foundation as partners and co-participants.

- iv) The membership agreement for the Shepherds of Freedom will include the following pledge:

“I pledge to work for the peace and security of mankind and Nature. I will see all Shepherds as unique equal Avatars. I will keep absent from my thoughts and words distinction by political ideology or religion. I agree to accept the Determinator Circle method of addressing conflict of every kind that may arise. I agree to end my tacit support of any corporate or governmental entity that is involved in the destruction of environment and peace. In fact, I join as a Shepherd to find power in numbers, to do so. I will refute any inner temptation that resembles greed, refuting bribes, or personal profiteering and replace my programmed selfishness with a commitment to universal wellbeing, and commitment to personal

prosperity of functional wealth, health and joyous spirit for myself and all others. This includes the personal temptation for public adulation, fame and power. While I understand that natural leaders and Living Treasures will arise, I align my understanding of personal power away from any idea of using money as power to control others, removing my own control by others through money, or attempting to control anyone using money. I recognize that within the Shepherds we are evolving our Democratic Representative Republic, to continue absent the corruption that has endangered and destroyed the planet, putting it at eminent risk of death. I will pledge to invite only those who I can count on to behave with maturity, and I will be accountable for those whom I invite into the Shepherds of Freedom club. I agree to never ever use insults, or personal attacks on any Shepherd, and to maintain civility at all costs, learning and using nonviolent communication, and using the Determinator Circles for any accusation I may have or

that may be brought against me. I agree to participate in our self-governance, to be humane towards all forms of life, and to work in unison with all Shepherds to promote conditions for the resumption of Nature's health, and so our own. I reject any ideology that states by its practice or words, that some of the people must be in service to others for the others to experience prosperity. Instead, my participation in the Shepherds of Freedom is specifically to enjoin with all peoples to experience and protect the gifts of Nature for peace, wisdom and humanity. This pledge I make in full alignment with my heart, mind and spirit."

4. **EweGrow Regional Employee Owned Trusts (EoT's).** As specific regions get organized to create local infrastructure for food growth, an Employee Owned Trust will be created to host their local EweGrow organization. The reason the organization is in a Trust Company is to form the enterprise in a stable manner for expansion.

- a. There shall be investors that want to invest in their regional employee owned trust, the employees then work with their company to repay the investors, eventually owning it themselves.
- b. The Regional Employee Owned Trust will host local EweGrow businesses that specify according to the region, as EweGrow Chicago, or EweGrow Atlanta, etc. While EweGrow will seek partnerships with local businesses, increasing their sales and creating a demand for their products, it is the Regional EweGrow EOT, that will harvest that commission, and run the agency for local work. Some regions may need more greenhouses, and others may need more farms, gardens, healing centers and schools. Employee Owned is employee directed.
- c. These regional Employee Owned Trusts will collaborate with other employee owned trusts, and be represented in the EweGrow website, with a subpages devoted to their own region. The Regional Employee Owned Trusts are run by members of the Shepherds of Freedom, and use the self-governance method for their region, and for the whole national club.
- d. Chicago, for example will have a number of needs, including increasing the organic food supply, it will have security needs that

the police are standing down from. The Chicago Regional EweGrow, may decide collectively to institute a security branch, and create a network of residents dependent upon it for a fee.

- e. Because the ECoV investment becomes exchangeable, the Chicago Regional EweGrow can use their local investment and return of organic foods as a MoE. Involving local parents in their childrens needs, and creating social events to channel the energy of people yearning for purpose. The ECoV offers purpose.
- f. Many inner city persons are terribly enraged, without feeling a manner to usefully express their energy positively. The Chicago Regional EweGrow will begin to invite and introduce Chicagoans to the power of EweGrow and the power of the Shepherd of Freedom club.
- g. As mentioned before, the Shepherds Of Freedom as a private membership club for trading and growth, will have local branches of the club. Not everyone in the club will be an employee of a Regional EweGrow Employee Owned Trust. The National Shepherds club will propose ventures and projects on a national scale, and find leaders

for those ventures and projects. The local regional Employee Owned Trusts will do the same for local ventures and projects.

- h. Until Employee Owned Trusts are instituted, the local work of EweGrow must take place as an agency through the central website. As soon as the EweGrow Foundation invests in a region, its work will be to secure for local prosperity the Employee Owned Trust(s) needed. A singular Employee Owned Trust will have an outside limit of 150 employees before splitting into two trusts.
- i. The EOT's will have a royalty, commission and use schedule to tie into the EweGrow national network and to benefit from Foundation, the Shepherds, and In Safe Harbor, the venture capital firm specifically to maintain investment capital for EweGrow's work.
- j. Certain EoT's may become specialized in certain areas of commerce, products or services. This is beneficial to the whole.
- k. AS a web of EoT's builds the students of the Foundation will have options to work/learn/earn in a variety of places in the USA.
- l. Again, EweGrow will specifically maintain a social networking ability within its website, and encourage the inventors of free energy to

open source their work, and receive recognition and reward for doing so.

- m. Through its Regional EoT's and its national website, EweGrow will offer a citizen journalism space for news specifically of progress of Americans Rebuilding America. Social Events, eat-in teach ins and product expos are the word of mouth invitation to community to get involved.

### **Legal Approach and Elements**

5. The EweGrow Enterprise Constellation is focused on funneling economic viability and power to the people of America, and to address the abuse of power of corporatism. As discussed, the Shepherds of Freedom private club is a key component to the transition of authority to the people. EweGrow may have to be flexible in its delivery of this club, since there is not much law established for online clubs. What I could find was that most clubs have small numbers of members, however numbers of clubs have numbers of chapters, I believe the Lions clubs and the Kiwanis clubs are examples.

The Most important reason for the Shepherds Club is to protect both sides of a trade between willing parties, and to allow for the practices that create a healthy food network. However you slice it, the mega farming practices are harmful to

the planet, mono cropping, pesticides, chemical fertilizers, GMO's drifting from field to field, neonicotinoids on 79% of the crops. The fact is, that concentrated biodynamic farming produces food with nutritional value, safe from alteration and redeems the soil.

It likely does not need to be emphasized that de centralization of our food supply, such that local food is available in an organic form, and meats and produce are not being shipped over to China for processing then shipped back to America for sale, and the reduction of white flour and white sugar in the American fare, reduction of chemicals of all kind is the right direction for health of Nature environment and our bodies.

Increasingly, the governmental and corporate partnership that has encouraged the destruction of the environment and of health is exercising its control. Some examples come to mind, Although it's the right thing to do, there are neighborhoods who do not have the 'right' to dry laundry on their lines, or the 'right' to plant a garden. Now the USDA wants everyone to register their gardens, which leads only in one direction, a systematic plan to control what people are allowed to plan and with what processes. One wishes that we can trust the government, however, the fact that we are at a place of planetary extinction and the government is fomenting world war three, pushing and demanding

experimental medicines be injected into children and workers that have no beneficial and without proper safety analysis, and are holding political prisoners and fomenting violence in the streets, should be sign enough that they do not have wellbeing of the people at the core of their process.

What EweGrow offers is a place for people to find the strength in numbers. The legal protection of a team of lawyers while the people enter into a new and private trade arena and use a new and updated method of self governance, including the issuance of MoE's. Should the people 'rise up' and attempt to 'overtake the system' its clear we will end up right back in a dictatorship. Additionally, should a 'Good' leader get into place, or even multiple good leaders, the reality is that Americans need to rediscover their authority in self governance. Good Leaders are easy targets for take down or hindrance in a myriad of ways. Good leaders are subjected to the coloring by a press, which keeps them invisible to the Americans who have an enormous amount of rage and anger, from the reality that they do feel so powerless and the wrong things keep happening around them. EweGrow, and its entire constellation provides for important stability of transition away from the destructiveness of current systems. First of all, EweGrow makes it fun for us to become healthier, we become more prosperous, and as our numbers grow we become more united to dissolve and

remove the destroying parties from our realm. EweGrow gives us a an organizational structure to lean on, and to keep the peace, while learning a new way to conduct our self governance.

Central to our founding fathers principles, the Congress (representative of the people) were to retain control of the money supply. Issuing it in proper proportion to our needs. Today, the money supply is changing, and people are familiar with currencies, crypto, digital and otherwise. The only step we are not yet practiced in is the role of issuance.

This is a bit of dance, since of course there are constitutional challenges to the issuance of currency. However, work arounds are all around us. Coupons, credits, trade swaps and yes, now cryptos. EweGrow is headed the opposite direction of the destructive old corporate governmental system. EweGrow places FAITH in the full freedom of Americans, and our ability and willingness to take care of one another given the structure to do so.

Legally, lawfully, we have every right to do so, since all power resides in the people, and not only do we have the right to reform our self-governance, we have the duty to do so when our systems are killing and destroying society and the planet.

Trading clubs and business exchange clubs exist for large corporations, and the people can have that benefit. There is great safety to be had in decentralized product creation. What EweGrow will offer is small batch marketing. Combined with a ECov, EweGrow Certificate of Value MoE, Means of exchange, the amount of MoE circulated will grow to match the needs of Americans. Ending the artificial scarcity managed by the current controllers of the economy, the big private bankers, inclusive of the Federal Reserve.

Most importantly, perhaps, is our transition from destructive energy sources to the clean ones. These technologies have been ruthlessly and idiotically suppressed for the gleaning of value by the big oil, big energy industry. Not only is solar and wind never going to be able to provide, it is not a clean answer to move into electric vehicles at all, in fact, our very own government has access to technology that would allow us to run our entire economy without ANY form of pollution whatsoever, no lithium mining, no air or water pollution.

We are at a point in our existence that we have to do two things or face planetary extinction inside of 2 decades, we have to use free clean energy and we have to live in peace together. EweGrow is providing the structure to peace.

A singular leader cannot successfully introduce a method of just money supply, because a singular leader is so easy to remove, to assassinate, and end the

entire progress. Thus, creating a EweGrow Enterprise Constellation wherein the governance structure permits the people to be introduced and practice the issuance of their own MoE, backed by the value of their products and services, serves the demand of turning our back on destruction and heading towards life.

It's a deep historical cesspool to examine the historical path of debt enslavement and control of the economy by the central private banks of the people, and the evolution of money as authority over others, essentially, it depended on the control of information, the censorship of information, as well as the public damning of aware voices.

The first component to our freedom is the mature desire of our people for the happiness and freedom of each other, and the understanding that one's own freedom and happiness grows by measure of the same in others. We have a disturbed, wounded and confused population, especially amongst the younger who have been both indoctrinated with nonsense, and trained to be compliant. Our stability and quality of interaction will draw these spirits, now adrift in the fous waters of a stormy aftermath of corrupt intentions. Staying steady on with our boundaries of focus on cleansed organic food, cleansed water, cleansed air, the open sourcing of energy devices that will remove pollution and dependence on utilities, beautifying our lives and society, encouraging individual passion and

quality, healing for healing sake, rather than for profits sake (possible with the proper and just MoE supply), backing up each other when calamity arrives with the same MoE supply, and giving each other work that serves humanity, so that we are not dependent on income from the very corporate world that destroys our planet and our future.

EweGrow is designed to grow rapidly and be able to host the peoples yearning for peaceful positive methods of change, think of it as inflatable. Think of in the manner that some domes are created, first an inflatable dome is filled, and then the exterior product, usually a cement derivative is sprayed on, and then the inflatable part is removed. The outside is waterproofed, the windows, doors and wiring it put in, only soon enough, once we open source the next inventors of free source energy, and provide them with the recognition and reward for doing so, wires will not be needed, anywhere. Please avail yourself of the work of Dr Stephen Greer specifically his current film, and work: The Lost Century for any proof you may need of this reality.

Additionally, on the medical front, sadly, as well, cures in plain sight have been likewise suppressed and removed from practice. The Hoxsey Therapy, when natural cures for Cancer become illegal, is a good start for a view into the world of allopathic profit based products. We have much healing to do.

EweGrow is a gathering place, a place where people with all kinds of knowledge and intuitions may help uplift one another. A place where dividing is not permitted, dividing usually begins with ad hominem, insults. Dividing happens for one purpose only, to destabilize the whole so that some may control others. EweGrow will invite all kinds of communities who have within themselves proven their ability to be peaceful in their affairs. While absent a singular religious doctrine, EweGrow is reflective of high spiritual principles, and the Determinator Circles deliver what is termed the Law of Love. Love, agape love, such as the kind that Dr Martin Luther King, Gandhi, John Lennon, instruct, is the strongest foundation for peace when implemented as described in EweGrow's Determinator Circles. What is the most loving thing to do for the good of all? This singular question can guide every inch of our way. It is law on the highest plane.

Right Now, we do need attorneys in the old legal system, to have our back and to fight through the thicket to the future, its our job as all others to face each other and roll up our sleeves, and leave our ideological differences on the curbside, working together towards life itself, and ending destruction. We will be helping to guide the next generation in the examples we set of justice within application of the law of Love. EweGrow will channel the empowerment across

our people, as we all know that we must love our way forward, fighting our way forward is certain suicide.

EweGrow's team work to use the skills sets needed for the Life of the planet, means that we are open to providing host agency for protective services, not only of lawyers, also of firefighters, peace officers and security. EweGrow will attract people who respect fairness, and who thrive amongst their unique perspectives, and who enjoy learning of each other's information.

The Employee owned trusts is the best form to grow rapidly, rather than a coop or llc form, since the structure must withstand the rapid growth in a manner that allows for thousands and even millions of people to come into EweGrow. The Trust form is a stronger structure, where it repels any misdirected efforts to derail or alter the direction of the whole towards synthesis of efforts of freer people. We must remember that we are for prosperity, rather than profit. We are Avatars, rather than consumers, taxpayers, etc..

The Shepherds of Freedom will be the leaders showing the way to work together for the Life of the planet and to care for one another. Not matter how the current system depicts EweGrow, our right to life depends on our work to create a true organic food supply for all of America and to generate open sourced "free" energy devices, to manufacture and distribute them, to heal one another

from the abomination of profit from sickness, and to encourage our children in the ways of peace, harmony, prosperity, creativity, and unity.

The higher law directs us, and we will stand up for our right. This is why the majority of our EweGrow work will be in the EweGrow Foundation Nonprofit. As everyone should know, a non-profit does not mean that employees are not well compensated. It merely means that prosperity can its aim by design, and profits are directed to the increase of that work.

The Shepherds of Freedom club, a legal private arena, allows for the lawful work of deciding the terms of our own MoE, and our own conditions of product and service exchange. It allows for our self-governance, more on that in a different chapter.

The EweGrow initial company, an LLC, is established like a star above a tree, to focus the image, symbolic themes and provide a network agency and sightline for the rest. It can also become a trust company, however, once the federation of regions are established and the website is well running, the EweGrow LLC can be dissolved and the holdings, the royalties from the use of the trademark etc can be placed in trust and managed by a selected subset of the national federation.

Wealth will be experienced in an entirely new fashion. The mere presence of digits in ones accounts and personal power over others by and through this will

end. Wealth will be experienced as a synthesis of health, purpose, encouragement and prosperity. It may be that we, here in America, by virtue of our Founding Fathers, and the rights they authored as the foundation of our law, will give us the opening we need at this time in history.

## 6- Funding Strategies; MoE's, ECoVs, and FUNs

Stage 1: EweGrow will launch a GiveSend Go for raising initial 10-100k funds for the following:

- (1) File EweGrow for NonProfit status, cost and outsource work

Budget: 1000

- (2) To file for the trademarks in the categories of networks, and agency (the trademark has been filed for gardening services).

5,000

- (3) To hire IT to create and host the website,

49,000

- (4) Hire EweGrow site design, logo design and product design

15,000

CONT.

**Commented [ep4]:** The answer to this question: - Fundraising? Maybe you can make it more elaborate. Target participants and motivation for doing so.-will be here, in a chapter of its own:

- (5) Retain Legal representation,  
 review Shepherds club plan,  
 draw up contracts for EoT  
 Investors and member owners  
 To review company structure  
 Taxation issues, and MoE issues.

Budget cont. 30,000

---

100K

As soon as the non-profit EweGrow Foundation is created and the bank account readied, the Treasurer ( Thomas Simon) and legal ends secure the quid pro quo, EweGrow offers ECoV.

EweGrow Certificates of Value

The holder donates and holds certificates redeemable for organic products and produce generated at the close of the growing season.

The established organic farms and farmers will have the capitol to plant and expand, and, instead of paying the loan back with money, deliver products and produce at cost to investing members, and next to the public where demand for organic is growing exponentially. The global market share for organic is currently growing at an 12% rate, EweGrow believes that will exponentially increase as public awareness grows of causation of environmental and health disasters by farming sectors grow. See below:

[www.researchdive.com/346/organic-food-market](http://www.researchdive.com/346/organic-food-market)

According to new report published by Research Dive, Organic Food Market Share to garner a revenue of \$484.0 billion in the 2022–2030 timeframe, growing from \$168.5 billion in 2021

#### Global Organic Food Market Share, By Food Type, 2021

Source: Research Dive Analysis

#### Organic Food Market Size to Hit Around USD 497.3 Billion by 2030

According to Precedence Research, the global organic food market size is projected to hit around USD 497.3 billion by 2030 and poised to grow at a CAGR of 12.06% over the forecast period 2022 to 2030.

#### From the USDA

Have you noticed, while in your local grocery store, that you have been seeing more organic products? This growing segment of agriculture is more prevalent now than it was just a decade ago and we have the data to show it.

First, it is important to note that organic is not just a label. Producers must adhere to strictly regulated processes and be vetted by USDA-accredited certifiers in order to receive the organic designation.

The USDA certified organic label gives farmers a strong marketing tool and offers consumers assurances that these products meet standards.

According to the recently released results of the 2019 Organic Survey, a 2017 Census of Agriculture special study, we can see a 17% increase in the number of certified farms in the U.S. between 2016 and 2019. In 2008, there were around 11,000 certified farms. Fast forward to 2019 and there are more than 16,500. If you look at sales, there was a 31% increase from 2016 to 2019. Total sales of organics in 2019 reached an all-time high of \$9.9 billion.

Since the first NASS organic survey in 2008, the number of organic farms, the acres used for organic production, and the value of organic products sold have increased, with value of sales more than tripling between 2008 and 2019.

As a direct effect of this growth, the availability of certified organic commodities has increased. Organic farms reported \$2 billion in direct sales to retail markets, institutions, and food hubs. Organic farms sold an additional \$300 million directly to consumers.

[Another highlight](#) (PDF, 549 KB) from the recent release shows California continuing its lead in organic production, with \$3.6 billion in sales, or 36% of the U.S. total. That may not be surprising, but what if I told you it would take sales from the next eight states combined to beat California's total? Or that organic milk and organically raised broiler chickens are the top two U.S. commodities with more than \$1 billion each in sales? Fifty-eight percent of U.S. organic sales came from crops, with apples and lettuce leading with \$475 million and \$400 million in sales, respectively. Other top organic crops are grapes, strawberries, and corn for grain.

As you can see, organic is a thriving agricultural segment.

And

The researchers conducted a meta-analysis of 44 studies representing 55 crops grown in 14 countries on five continents over 40 years, and found that **organic farming was actually 22-35% more profitable than conventional agriculture**. Organic foods, the study found, often include a price "premium," or markup, of 29-32%.

The Donator may donate beyond their needs and invest in specific organic farmers as hired by in a regional EoT, which begins the local employee owned trust's work to create new farms, new products, new healing and new manufacturing.

These are donation/investments by modest to wealthy people through tied to a product return. We look to raise <50,000 for use per specific locale. the NonProfit directs these funds to the following: Paying local farmers (creating new micro organic farms with larger gardeners) to put in and expand their crops and help.

What the EweGrow Foundation can do, and the In Safe Harbor star venture firm of EweGrow's Enterprise Constellation, is to ensure investors of the cleanliness of their own food supply, and expand the organic food supply and initiate these certificate of value which act a means of exchange (MoEs).

Walking through the path of the ECoV creating and circulation.

The investor/donator puts 50k and receives 5 k in certificates,- whether the National Foundation handles the transactions or, when established, the local EREoT (EweGrow Regional Employee Owned Trust) depends on the existence of the latter.

By Example: 50 K is invested in 4 farms say, and the farms use it to plant say, organic strawberries, and blueberries, raise organic chickens, grow organic

**Commented [ep5]:** Find and use correct word, if a donator receives a cert of value, are they donating or investing?

lettuce, kale and green, and organic microgreens. The farmers produce with that 50K, products, that are sold at a profit to the market. The investor can turn in their certificates for organic products. EweGrow Foundation or EweGrow Regional Trusts as they are established, provide a pooling of CSA type funding, with the ability for investors to claim returns in product, and to hold investment forward past the year cycle. There may need to be language preventing the Certificate holder from gaming the investment to buy low and sell higher elsewhere. A legal question. The certificate holder has a return on investment at a TBD (15%?) percent of the growers net prosperity.

EweGrow will, through its website, create networking sales of products, the pooling of CSA funding, becomes the products that otherwise people would not afford, since the investment can be repaid at a cost value. IN other words, the organic producer produces more than the investor can eat of one organic commodity, and then collectively the farmers pay the investor back in food, at a lessor cost than retail, and retain the retail income of the products.

First the Foundation, then in conjunction with the EREoT's manifest the processing support, delivery and marketing, training and purchase of land to allow the organic farmers to focus on their gift.

The organic lands will be held in trust by the EREoT, and by organizational structure remain private for the region.

The Foundation develops specific protocols to expand the heirloom seed supply, promoting social leadership on a micro scale, to do so. The organic seeds that

are grown from, for example a row of 10 peppermint plants in pots gone to seed and tended by a social media mini star who carefully shares her seed saving process and carries a group of others along with her, then packets the seeds for sale on the EweGrow Market place. The mini social media star receives the seeds, the pots and the soil and an independent contract that grows in value with the number of followers who are, with her or him, growing too. The EweGrow website then hosts the seeds grown by the mini social media leader star and sells the packet with her/his name on it, and receives commission from these sales on of sales from the other growers seeds. The entire process is live streamed/ shared in segments on social media, and the numbers of seed savers and growers increase.

EweGrow will sponsor competitions for best outcomes, for single seed outcomes: such a competition for: A singular plant producing the greatest number of viable seeds for its category. Or a singular plant being the hardiest. Or the best quality.

Creating a trend status bar for the rebuilding of our seed supply.

Since the USDA will not work with these tiny producers, EweGrow will, and establish a new designation, Trulove Organically Grown, this means the spiritual value of love which translates into the higher frequency of the products is designated.

As the products are sold on EweGrow, the testimonials and the star ratings create a further demand and valuation. Those with the highest rated products and process will be supported to create more producers using the same process. The Foundation will use donations to invest in the training of new producers and their land needs. At all times the Land remains in a nonprofit hands, in a trust and 99 year leases work for the creation of family farm compounds and community farm compounds. Trailer parks with their numerous tie ins will be purchased and rebuilt with natural buildings and furnished with greenhouses, growing towers and the workspace for organic life compounds.

#### Healing:

Organic food supply and healing goes hand in hand with healing. Natural cures for all our major ailments will be made known and available. Healers, be they accredited or not will be protected by the Shepherds of Freedom private club to practice their healing in accordance with their wisdom and assessed in accordance to their outcomes as rated by patients ratings and testimonials. Healers can receive their pay in organic food, from the ECoVs that the investor bought, and the Healer can sell their ECoVs to pay for other products within the EweGrow network.

Builders, mechanics, electricians and masons can as well, get paid in ECoV and be hired with them.

Understanding that prosperity is the function of the EweGrow Foundation, which in turn alleviates social ills and cost to society, the non-profit status of these professions are included. Facing the existing destruction of our society and planet by existing governmental corporate partners, and standing up for our right to life to rebuild sanity step by step with zero penalty and zero support for the destructive ones.

EweGrow will partner with investors and investing members to furnish inventors with live open sourcing, live streaming labs to develop the free energy solutions and then to manufacture them with speed. Networking with people around the world to implement them and free the world from utility domination, toxification and suicide.

AS EweGrow contributes to economic stability, peace grows. AS the anger violence of gangs is transformed into living prosperity, peace grows. AS the people eat together and grow together, agape love grows.

This has a value. The EweGrow Certificate of Value is promoted for this stabilizing agape love value. What is peace worth? Everything.

When the number of EweGrow's Shepherds of Freedom expands to 10k, even with the sum of members from the numbers of club branches then through our proposal and voting system the initiation of FUNs will begin. Familiar Universal Notes, that are independent of ECoV, in that they can be directly issued without loans. These are untaxable and kept in the closed loop of the Shepherds of

**Commented [ep6]:** This is a legal question, I cannot find any statute that limits the size of private membership clubs, however, at 150 persons, the clubs can divide and create another. 149 persons is the number of persons shown to be ideal size for a company since this number is the magical number that allows for meaningful interaction by all members ( or employees), beyond this size the facelessness ensues).

Freedom. They are issued and accepted by the Shepherds to rebuild America.

When the members vote, for example to direct issue 500k of FUNs, then the recipients can use those FUNs to create products, and services for the Shepherds Network.

Insofar as the network expands Americans have access to MoE that does not suck the value of their work to the greedy, and serves the prosperity of all, wherein some will become wealthier, but none will serve greed, or be able to use money as power over others.

If, the supply of FUNs every were to outpace the services and products that are being created for market with it, the Shepherds shall then vote to place a commission fee on the transactions and retire some of the FUNs. Zero inflation, and Zero Deflation, steady state economics.

AS the free energy devices are delivered globally, the landscape of horror transforms to beauty, the people of the globe relax in peace. Their relationship with nature improves and deepens.

AS the people of America and later, the world, experience the economy of harmony with nature and peace with each other, the need for forms of symbolic value to propel exchanges in the economy dwindles. People simply do what they do best with the loving support of each other. Networking for components of their desires and purposes. Who can say when this will occur.

One statement EweGrow can make equivocally, either this is the direction we head or we dig our graves, don't bother with making a will, there will be no one

to enjoy it, or simply fall dead where we are within a decade. In keeping with the manner we are currently killing all other life forms on this planet. WE, you and I are doing the killing by our compliance with existing monetary economic corporatist methods.

**In other words, it's  
Everyone, head right away to a shining  
future.**

**There is no other choice.**
